A CHAPMAN & HALL BOOK

Contents

Preface	vii
Editors	ix
Contributors	xi
1 Network Analyses of Biomedical and Genomic Big Data <i>Mayur Sarangdhar, Ranga Chandra Gudivada, Rasu B. Shrestha, Yunguan Wang, and Anil G. Jegga</i>	1
2 Distributed or Network-Based Big Data? <i>Bo Hu and Klaus Arto</i>	25
3 Big Data Text Automation on Small Machines <i>Ming Jia, Yiqi Bai, Jingwen Wang, Wenjing Yang, Hao Zhang, and Jie Wang</i>	39
4 Big Data Visualization for Large Complex Networks <i>Lei Shi, Yifan Hu, and Qi Liao</i>	79
5 Finding Small Dominating Sets in Large-Scale Networks <i>Liang Zhao</i>	121
6 Techniques for the Management and Querying of Big Data in Large-Scale Communication Networks <i>Yacine Djemaiel and Noureddine Boudriga</i>	147
7 Large Random Matrices and Big Data Analytics <i>Robert Caiming Qiu</i>	167
8 Big Data of Complex Networks and Data Protection Law: An Introduction to an Area of Mutual Conflict <i>Florent Thouvenin</i>	211

9 Structure, Function, and Development of Large-Scale Complex Neural Networks <i>Joaquín J. Torres</i>	225
10 ScaleGraph: A Billion-Scale Graph Analytics Library <i>Toyotaro Suzumura</i>	247
11 Challenges of Computational Network Analysis with <i>R</i> <i>Shiwen Sun, Shuai Ding, Chengyi Xia, and Zengqiang Chen</i>	265
12 Visualizing Life in a Graph Stream <i>James Abello, David DeSimone, Steffen Hadlak, Hans-Jörg Schulz, and Mika Sumida</i>	293
Index	313

Dr. Matthias Dehmer studied mathematics at the University of Siegen, Germany, and received his PhD in computer science from the Darmstadt University of Technology, Germany. He was a research fellow at the Vienna Biocenter, Austria, Vienna University of Technology, Austria, and the University of Coimbra, Portugal. Currently, he is a Professor at UMIT—The Health and Life Sciences University, Hall in Tyrol, Austria, and also holds a position at Nankai University, Tianjin, China. His research interests include graph theory, data science, complex networks, complexity, statistics and information theory. He has published extensively in data science and structural network analysis.

Prof. Frank Emmert-Streib's research interests include computational biology, biostatistics, and machine learning in the development and application of statistical analysis methods to investigate data from high-dimensional data. He has worked on problems from neurobiology, molecular biology, web mining, chemistry, and physics. He is currently working at the University of Tampere, Finland, as an Associate Professor focusing on the analysis of high-throughput data from complex diseases.

Stefan Pickl studied mathematics and received his PhD in mathematics from the Darmstadt University of Technology, Germany. He was a research fellow at Santa Fe Institute, New Mexico, and held several other research positions. Currently, he is a Professor at Bundeswehr Universität München, Neubiberg, Germany. His research interests include operations research, systems biology, graph theory, and discrete optimization.

Andreas Holzinger studied information engineering and physics at the Graz University of Technology, Austria, and received his PhD in cognitive science from the University of Graz, Austria. He received his habilitation in computer science from the Graz University of Technology, where he teaches biomedical informatics, and supervises engineering students at the Faculty of Computer Science and Biomedical Engineering. Currently, he is the head of research unit HCI-KDD at the Medical University of Graz, Austria. Andreas has been a Visiting Professor in Berlin, Innsbruck, Vienna, London, and Aachen. His research interests include machine learning and he has published extensively in computer and information science.
